(54) Title: MACHINE READABLE LABEL FOR TOKENS AND MEHTDOD OF USE

(57) Abstract: A method and system for completing transactions with a document such as a movie ticket. The document has a machine-readable label affixed to it. An account is associated with an identifier stored in the machine-readable label allowing a user to complete a transaction with the document as if it were a credit card. This make impulse purchasing more likely because transactions can be completed without a separate step for account identification and authorization.
